# 1. Qualitative Information on Results for the First Three Quarters Ended December 31, 2019

## (1) Details of Operating Results

House Foods Group regards the theme of “striving to become a high quality company that provides ‘Healthy Life Through Foods’” as a vision of the Group in the Sixth Medium-Term Business Plan, which commenced in April 2018. In the current fiscal year, the second year of the Sixth Medium-Term Business Plan, House Foods Group is taking steps to become a high quality company in all three of the responsibilities (“For our customers,” “For our employees and their families,” and “For society”) it seeks to fulfill as a corporate citizen.

- Key themes in the “three responsibilities”

For our customers	Creating innovation in the mature market in Japan and accelerating business development in overseas growth markets (value chain innovation, R&D innovation, the expansion of growth in overseas businesses and the strengthening of business base).
For our employees and their families	Achieving diversity and improving productivity (implementing work-style reforms, recruiting diverse human resources and creating a workplace where they can take an active role).
For society	Establishing a recycling-oriented model and achieving a society of healthy longevity through the CSR (Creating Smiles & Relationships) activities the Group conceives.

During the nine-month period of the fiscal year under review, the net sales of the Group decreased 1.3% year on year, to 222,639 million yen, principally because of difficulties experienced by the Health Food Business and the impact of the spin-off of the major logistics business to F-LINE Corporation in the Other Food Related Business, although the Spice/Seasoning/Processed Food Business and the Restaurant Business showed stronger performance than a year earlier, in addition to the expansion of the business scale of the International Food Business in the three key areas (the United States, China and ASEAN).

Operating profit rose 1.3% year on year, to 15,974 million yen, mainly due to the increased contribution of the International Food Business and the Restaurant Business to consolidated results, despite an increase in the burden of depreciation in the Spice/Seasoning/Processed Food Business, as well as difficulties in the Health Food Business and the impact of the spin-off of the logistics business. Ordinary profit increased 2.7% year on year, to 17,320 million yen, due to a rise in non-operating income mainly driven by an increase in the share of profit of entities accounted for using the equity method. Profit attributable to owners of parent declined 1.3% year on year, to 10,117 million yen, mainly because of a loss on the retirement of non-current assets and a rise in loss on change in equity.

The following is an overview of results by segment (before the elimination of inter-segment transactions).

Segment	Consolidated net sales		Consolidated operating profit Segment profit (loss)	
	Amount (million yen)	Year-on-year change (%)	Amount (million yen)	Year-on-year change (%)

(Note) 1. Adjustment (elimination) comprises profit or loss not distributed to segments and the elimination of inter-segment transactions.

### **Spice / Seasoning / Processed Food Business**

House Foods Corporation worked to strengthen existing businesses and to create new value given that the domestic market was maturing. In August 2019, the Group operated the new manufacturing lines of retort pouched products to strengthen its response to the growing tendency for people to eat out or buy food to eat at home.

In the nine-month period under review, sales of spice and snack products increased from a year earlier, while curry products secured results that were on par with the year-ago level. However, sales of stew roux declined from a year earlier, partly due to the weather during the demand season in winter.

The performance of Gaban Co., Ltd., which belongs to this business segment, remained firm in Japan and overseas, particularly in the mainstay pepper business. Malony Co., Ltd. was affected by the change of the book closing date in the previous fiscal year, while demand for nabe (hot pot) cooking was sluggish due partly to the weather.

As a result of the above, sales in the Spice/Seasoning/Processed Food Business stood at 109,317 million yen, up 1.7% year on year. Operating profit was 10,625 million yen, down 0.2% year on year, mainly due to the heavier burdens of depreciation associated with growth investments. As a result, the ratio of operating profit to net sales was 9.7%, declining 0.2 percentage point from the same period of the previous fiscal year.

### **Health Food Business**

House Wellness Foods Corporation worked to expand the area of the provision of value for daily health support for customers.

The functional spice business continued to face a difficult sales environment for the *Ukon No Chikara* series, the main brand, reflecting a decrease in the number of occasions for customers to enjoy a drink due to a decline in demand for drinking outside the home and competition, although it worked to rebuild points of contact with heavy users in ways such as launching high value-added products. On the other hand, the market penetration of *Nerunoda*, food with functional claims whose cultivation House Wellness Foods Corporation focused on, made steady progress.

In the vitamin business, the *C1000* series was strongly affected by the bad weather during the demand season in summer, and sales of *Ichinichibun No Vitamin* were lower than a year earlier due partly to the impact of changes in specifications for some products. For jelly products, which are expected to grow sustainably, the Group worked to improve the revenue structure by commencing in-house production in October 2019.

The lactic acid bacterium business, a new business, advanced efforts regarding the commercialization of *lactic acid bacterium L-137*, which is regarded as a strategic healthy ingredient.

As a result of the above, sales in the Health Food Business declined 10.8% year on year, to 22,529 million yen. Operating profit decreased 61.0% year on year, to 745 million yen due to the large impact from the decline in sales of main brands. As a result, the ratio of operating profit to net sales was 3.3%, declining 4.2 percentage points from the same period of the previous fiscal year.

### **International Food Business**

In the tofu business in the United States, both sales and profits increased due to continued strong demand on the back of rising health consciousness and environmental awareness. While production capacity was tight in comparison with increasing demand in recent years, new lines were completed at the Los Angeles Plant in January 2020, ready to take on growth opportunities.

In the curry business in China, while sales of products for household use increased, this was not enough to offset the higher costs associated with the operation of the Zhejiang Plant in the previous fiscal year, resulting in a decrease in profits.

In the functional beverage business in Thailand, both sales and profits increased, reflecting continued growth in *C-vitt* in both modern trade such as convenience stores and the traditional market, supported by strong demand.

As a result of the above, sales in the International Food Business rose 14.2% year on year, to 22,083 million yen, and operating profit increased 24.3%, to 3,396 million yen. Consequently, the ratio of operating profit to net sales was 15.4%, improving 1.3 percentage point from a year earlier.

### **Restaurant Business**

Ichibanya Co., Ltd. enjoyed higher sales and profits due to the effect of price revisions made in March 2019 and overseas subsidiaries, which remained solid. At stores of Ichibanya Co., Ltd. in Japan, sales remained firm, with the combined sales of all directly managed stores and franchised stores rising 0.8% year on year and sales at existing stores increasing 0.6%. While the number of customers at existing stores declined 1.5% year on year, mainly due to the impact of the consumption tax hike in October 2019, in addition to typhoons and heavy rainfalls from August, average sales per customer rose 2.1% year on year due mainly to the impact of price revisions.

The restaurant business operated by House Foods America Corporation, which was included in this business segment, was transferred in June 2019.

As a result, sales in the Restaurant Business including Ichibanya Co., Ltd. and other restaurant subsidiaries increased 1.1% year on year, to 39,240 million yen. Operating profit was 469 million yen, an increase of 841 million yen from a year earlier due to the effect of price revisions and growth in earnings of overseas subsidiaries, despite the burden of the amortization of goodwill and intangible assets were recognized upon making Ichibanya Co., Ltd. a subsidiary included in the scope of consolidation. Consequently, the ratio of operating profit to net sales was 1.2%, rising 2.2 percentage points from a year earlier.

### **Other Food Related Business**

Delica Chef Corporation, a Group company that produces prepared food for convenience stores, improved profitability by focusing on strengthening its development capabilities and improving productivity, despite the impact of the deteriorated employment environment.

Vox Trading Co., Ltd., which imports, exports and sells agricultural products and food, continued to work on increasing the earnings strength of the core business and expanding sales of high value-added products.

House Logistics Service Corporation, which belongs to this business segment, span off its major logistics business, excluding orders received and yard handling business operations, to F-LINE Corporation in April 2019. Because F-LINE Corporation is an equity-method affiliate of the Company, the spin-off was not reflected in the results of this business segment.

As a result of the above, sales in Other Food Related Business decreased 24.7% year on year, to 35,138 million yen, and operating profit declined 14.2% year on year, to 1,573 million yen. Consequently, the ratio of operating profit to net sales was 4.5%, improving 0.5 percentage point from a year ago.

## **(2) Details of Financial Position**

The consolidated financial situation at the end of the third quarter of the fiscal year under review is as follows:

Total assets were 373,455 million yen, an increase of 2,430 million yen from the end of the previous consolidated fiscal year.

Current assets increased 3,789 million yen, to 148,544 million yen, mainly due to increases in notes and accounts receivable – trade and securities, despite decreases in cash and deposits and merchandise and finished goods. Non-current assets decreased 1,359 million yen, to 224,911 million yen, mainly due to decreases in goodwill and lease assets, offsetting increases in construction in progress and machinery, equipment and vehicles.

Liabilities stood at 90,129 million yen, a decrease of 1,752 million yen from the end of the previous consolidated fiscal year.

Current liabilities were up 162 million yen, to 55,469 million yen, mainly due to an increase in accounts payable – other, while income taxes payable decreased. Non-current liabilities declined 1,913 million yen, to 34,660 million yen, chiefly due to a decrease in lease obligations.

Net assets stood at 283,326 million yen, an increase of 4,182 million yen from the end of the previous consolidated fiscal year, mainly because of an increase in retained earnings thanks to profit attributable to owners of parent, although foreign currency translation adjustment decreased.

As a result, the equity ratio stood at 67.3% (compared with 66.6% at the end of the previous fiscal year), and net assets per share amounted to 2,494.74 yen (2,454.34 yen at the end of the previous fiscal year) at the end of the third quarter of the fiscal year under review.

## **(3) Information on the Future Outlook, Including Consolidated Business Results Forecasts**

The consolidated business performance forecast for the fiscal year ending March 31, 2020 remains unchanged from the business performance forecast announced on November 1, 2019.

Application of Particular Accounts Procedures to the Preparation of Quarterly Consolidated Financial Statements

(Calculation of tax expenses)

The Company calculates tax expenses by reasonably estimating the effective tax rate after applying tax effect accounting to profit before income taxes for the consolidated fiscal year and multiplying profit before income taxes for the nine-month period under review by the estimated effective tax rate.

However, if the calculation of tax expenses using the estimated effective tax rate results in a markedly unreasonable outcome, tax expenses are calculated by using the statutory effective tax rate after adding and subtracting important differences that do not fall under temporary differences to and from profit before income taxes.

"Income taxes-current" and "Income taxes-deferred" are unified in "Income taxes."
