FY2019 Results

- ◇ **Middle year of the Medium-Term Business Plan**
 - **We made progress largely as planned, except in the Health Food Business, and operating profit hit a record high (for a third consecutive year).**
 - **We implemented initiatives to optimize production and made capital investments focused on expanding overseas production capacity.**
(Spice/Seasoning/Processed Food Business: We expanded production capacity for retort pouched products; Health Food Business: We shifted to in-house production of jelly; United States: We expanded tofu production capacity)
 - **We plan to pay a full-year dividend of 46 yen, an increase of 2 yen from the previous fiscal year (marking fourth consecutive year of dividend increases.)**
 - **In face of the Covid-19 pandemic, we will fulfil our supply responsibilities as a food company, while giving utmost consideration to the safety and peace of mind of our employees.**

* Total of retort pouched curry, retort pouched hashed beef sauce and retort pouched stew

Sought to tap into medium-to-long-term demand in existing and new segments of the domestic mature market

◆ House Foods Corporation

- Posted increased profit despite impact of environmental factors such as the consumption tax hike and the Covid-19 pandemic
- Sales of retort pouched products and spice pastes in large tubes grew
- Expanded production capacity for retort pouched products

◆ Malony Co., Ltd.

- Struggled due to decreased demand for nabe (hot pot) cooking due to the mild winter
- Started flattening seasonal fluctuation by launching instant cup products in limited areas

Issues: Implement revenue structure reform in response to progress in the maturation of the market (shift away from roux products to retort pouched products)
Respond to changes in consumer awareness post Covid-19

Health Food Business

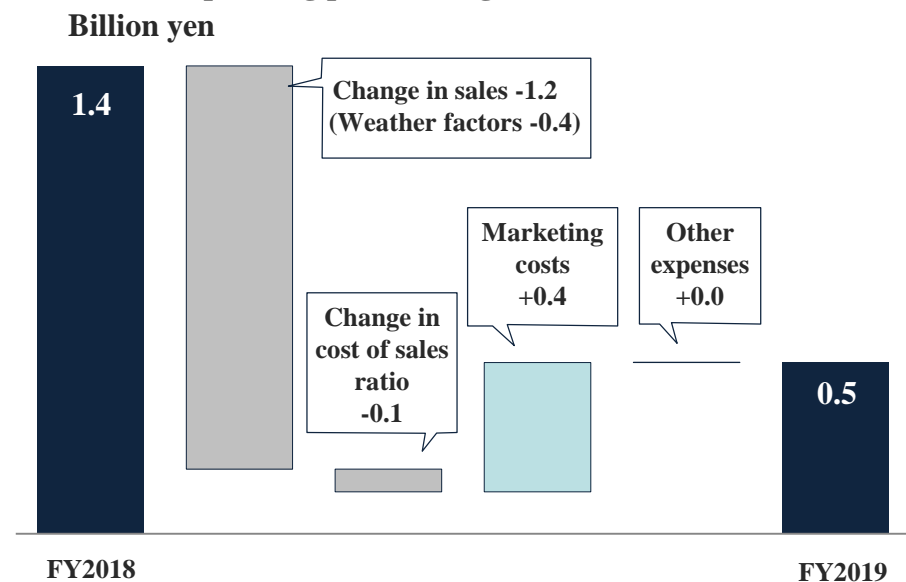

Billion yen	FY2019				
	Results	Year on year		Comparison with revised target	
Net sales	27.9	-3.0	-9.7%	-2.1	-7.0%
Operating profit	0.5	-0.9	-63.3%	-0.7	-56.6%
ROS	1.9%		-2.7pt		-2.1pt

◆ Breakdown of sales (main factors)

Functional spice	11.3	-0.2	-1.6%	-1.2	-9.7%
<i>Ukon No Chikara</i>	8.2	-0.9	-10.3%	-0.9	-9.8%

Lactobacillus business	0.8	-0.3	-28.8%	-0.7	-46.5%

◆ Factors in operating profit change

Profit fell sharply, reflecting decreased sales of the main brand and issues with the development a third business pillar, despite progress with revenue structure reforms

◇ Functional spice business

- *Ukon No Chikara*: The Covid-19 outbreak at the end of the fiscal year drastically reduced drinking out opportunities
- *Nerunoda*, food with function claims: Steadily penetrated the market, meeting the needs of consumers seeking to improve sleep quality

◇ Vitamin business

- Implemented revenue structure reforms (shifted to in-house production of jelly products and *Ichinichibun No Vitamin*), scaled back unprofitable PET products)
- Sales fell mainly due to weather factors during the summer demand period

◇ Lactobacillus business

- Put test laboratory into operation as step towards establishment of efficient production structure
- Struggled to become firmly established in B to C market and performed far worse than planned, reflecting delays in feed testing due to CSF and Covid-19, among other factors

Issues: - Restore brand power of key brands and ensure earning capacity

- Assess potential of strategic health ingredients and develop into next-generation revenue drivers

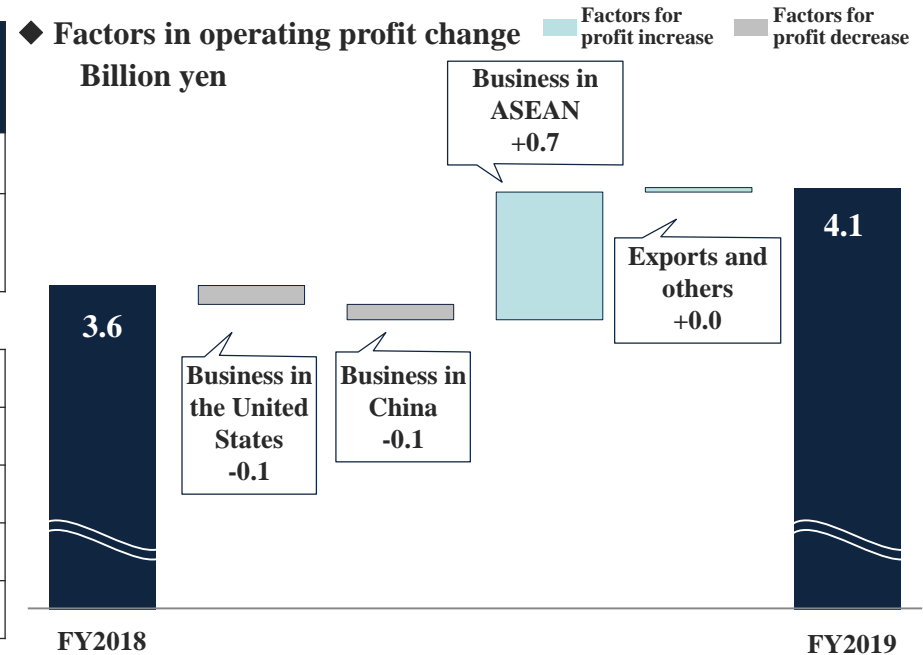

International Food Business

Billion yen	FY2019				Year on year in local currency	
	Results	Year on year		Comparison with revised target		
Net sales	29.7	+3.4	+13.0%	-0.6	-1.9%	+14.2%

Thailand	6.4	+2.3	+55.7%	+0.1	+2.4%	+50.4%

Issues remain but Thailand business achieved strong growth, driving segment performance

◆ Tofu business in the United States

- Prepared for expansion of production capacity while putting up with the tight supply capacity in face of strong demand (new lines went into operation in January 2020)
- Profit fell mainly due to higher labor costs associated with weekend production and higher tariffs on certain ingredients due to trade tensions between the United States and China

Issues: Tap into growing demand in plant-based protein market and continue to invest for growth aiming for higher productivity

◆ Curry business in China

- Sales fell short of target, reflecting failure to expand and train sales personnel as planned
- Profit decreased due to inability to absorb depreciation and amortization cost of Zhejiang Plant

Issues: Respond to sudden changes in distribution and consumption structure and establish personnel structure for realizing growth

◆ Functional drinks business in Thailand

- Achieved considerable growth, reflecting increased product recognition and penetration to traditional TT market
- Introduced price revisions in October 2019 in response to increase in VAT from same month

Issues: Strengthen collaboration with Osotspa (increase production capacity and strengthen quality assurance capabilities) and establish formidable brand

Impact of exchange rates: Net sales: -300 million yen (U.S.: -100 million yen, China: -300 million yen, Thailand: +200 million yen, Taiwan: -100 million yen); Operating profit: -0 million yen

Japan (all business categories)	Overseas
1,301 (-4)	186 (+14)

- ◇ Japan
 - Profitability improved as price revisions introduced in March 2019 led to increased revenue from products for directly managed restaurants and franchises
 - Decline in customers due to the consumption tax hike and introduction of the reduced tax rate was no greater than anticipated

- ◇ Overseas
 - Increased new restaurant openings, mainly in East Asia. Sought to improve profitability through price revisions, cost review and other measures

- Issues:
- Generate value chain synergy

House Logistics Service Corporation	1.0	-18.6	-94.8%	+0.0	+0.4%

◇ Delica Chef Corporation

- Posted higher profit thanks to stronger development capabilities especially for prepared foods and desserts, despite continuing to face tough labor market conditions
- Impact of cashless rebates in the wake of the consumption tax hike also contributed to performance

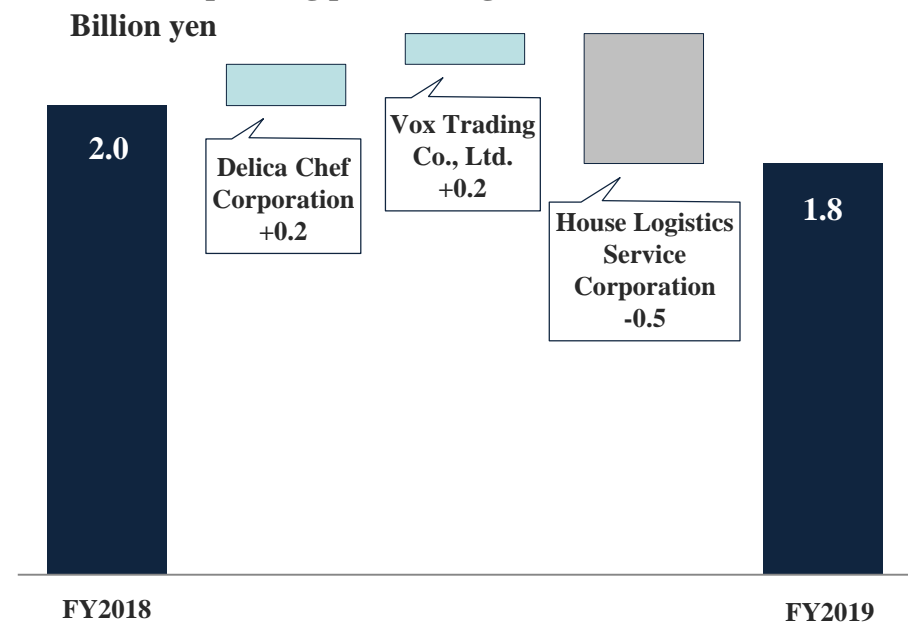

◇ Vox Trading Co., Ltd.

- Reported higher profit, reflecting focus on sales expansion of high added value products and growth in transactions with leading food service companies

Full-Year Plan for FY2020

◇ Assumptions

- **Although the effects of Covid-19 will vary depending on the segment, we assume that it will severely impact first-half performance and the pandemic will gradually come to an end through the second half.**

The Restaurant Business and the Health Food Business will be severely affected, and results are expected to fall short of final fiscal year targets under the Medium-Term Business Plan.

◇ Final fiscal year of the Sixth Medium-Term Business Plan

- **We will push ahead with the key themes under the Medium-Term Business Plan including the GOT themes, seeing changes in consumption post-Covid-19 as new growth opportunities, and prepare for the Seventh Medium-Term Business Plan.**
- **We plan to pay an annual dividend of 46 yen per share, which is the same amount paid in FY2019.**

Impact of Covid-19

◆ Main actions taken by the Group

- Continuing production in Japan and overseas to fulfil supply responsibilities as a food company.
- Thoroughly implementing hygiene management and measures to reduce the risk of infection (urging employees to work from home, conducting meetings via the Internet and telephone, etc.)
- Suspending sales of certain products to focus on production of core items. Working to minimize impact on customers and suppliers.
- Ichibanya is minimizing the impact on restaurant revenues through expansion of takeout, etc. whilst taking appropriate action in accordance with the guidelines set out by central government and local authorities including shorter opening hours and suspension of operations.

(Billion yen)

◆ Impact on each business

Although the effects of Covid-19 will vary depending on the segment, the impact was calculated assuming that it will severely impact first-half performance and the pandemic will gradually come to an end through the second half.

		Forecast impact in FY2020	
		Net sales	Operating profit
Spice / Seasoning / Processed Food Business	- Benefited from increase in home-cooked meals Home-use business: Demand grew for home-cooking products and for pre-prepared ready meals Food service-use business: Fewer sales opportunities	+0.2	+0.1
Health Food Business	- Dramatic decline in drinking out opportunities led to fewer sales opportunities for the core <i>Ukon no Chikara</i> brand - Sales affected by decline in customers at CVS, which is important sales channel	-3.6	-1.8
International Food Business	United States - Temporarily suspended operations at NJ plant to prevent spread of virus (planned suspension of around 2 weeks starting from Apr. 30) - Postponed initially planned price revisions due to social circumstances	-1.9	-0.6
	China - Operations are now almost back to normal - “Stay-at-home” economy caused sharp rise in demand for home-use products and stagnation of demand for food service-use products		
	Thailand - Sales affected by fall in number of customers especially at CVS as a result of curfew and there is concern over chilling effect on consumption		
Restaurant Business	- Sales at restaurants in Japan and overseas are expected to fall as consumption slows globally and people refrain from going out Assumed revenues from existing restaurants compared to the previous year: Japan 90% (1H: 87.5%, 2H: 92.5%) Overseas 65% (1H: 51%, 2H: 78%)	-6.5	-2.9
Other Food Related Business	- Trading company business was affected by decline in eating out demand	-1.0	-0.2

Spice / Seasoning / Processed Food Business - House Foods: The impact of growth in demand for home-cooked meals will offset the absence of special demand seen in the previous fiscal year and the impact of higher retirement benefit expenses, and profit is expected to increase.
- GABAN: Significant decline due to a dramatic drop in eating out demand is anticipated.

Health Food Business - *Ukon no Chikara* will be hugely impacted by a sharp decline in drinking out opportunities as people refrain from going out. We will reduce costs as much as possible especially in the first half.
- Growing health awareness will work in our favor in the long term. We will focus on vitamins, jelly products and lactic acid bacteria.

United States

- We started increased production (by around 30%) at the LA plant from January 2020 and plan to reach full-scale operation in the second half.
- Profit growth is expected to be limited due to higher labor costs. (Price revisions will be postponed until the Covid-19 outbreak is over.)

China

- We expect it will take time for the restaurant market to return to normal and will concentrate resources on the home-use market.
- We see growth in demand for home-use products due to “stay-at-home economy” as a good opportunity and will focus on activities in anticipation of post-Covid-19 times.

Thailand

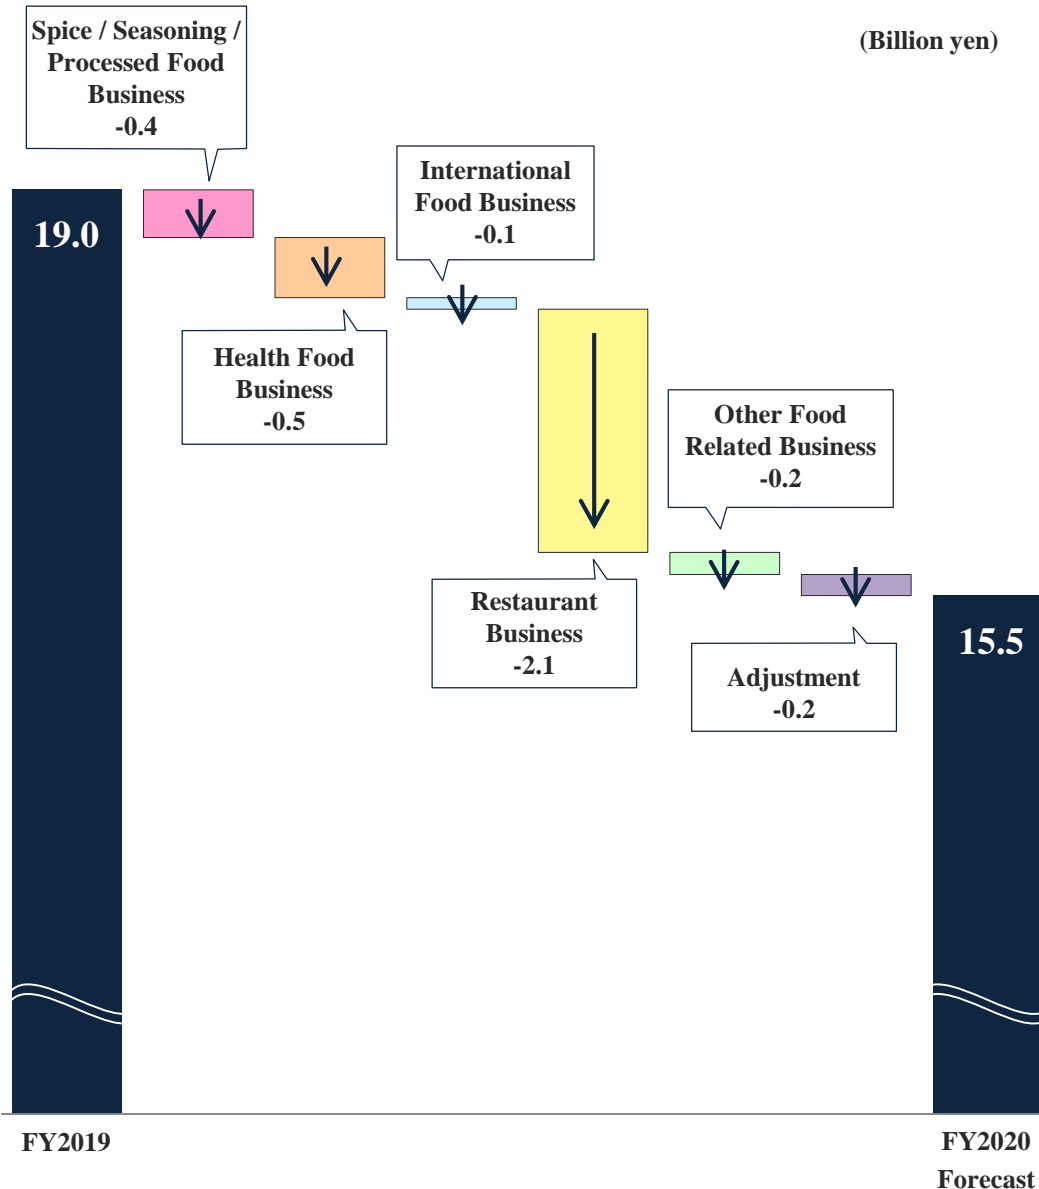

- Despite concern over the impact of Covid-19, demand for vitamins is firm and we will focus on establishing formidable brands.

Restaurant Business - Sharp declines in sales and profit are forecast both in Japan and overseas due to the suspension of restaurant operations and shortening of restaurant opening hours due to Covid-19
- We will seek to minimize the business impact by strengthening takeout and home delivery.

Other Food Related Business - Manufacturing prepared food, etc. for CVS: We will strive to maintain revenue by further improving development capabilities and cost competitiveness.
- Trading company business: We will seek to minimize the impact through expansion in sales of high added value products and a review of the product mix
